

Shade Installation Instructions

C11

For fixtures requiring assembly, please refer to assembly instructions before shade installation.

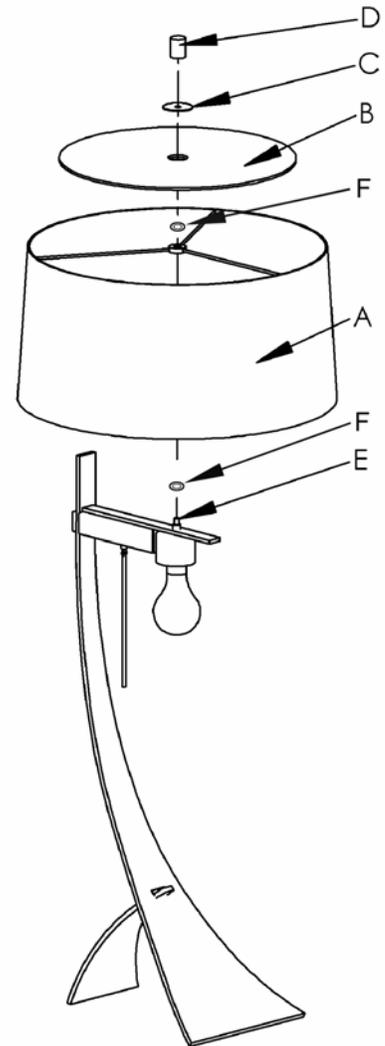

Component Parts

- A Shade
- B Optional Glass Diffuser (sold separately)
- C Washer
- D Finial
- E Threaded Stud
- F Small Washer (2)

Note: The two small washers are slightly rounded.

To Install Shade

1. Place one Small Washer (F), rounded side up, over Threaded Stud (E).
2. Place Shade (A) over small washer (F).
3. Place second Small Washer (F) on top of shade, rounded side down.
4. Place optional Glass Diffuser (B) on top of small washer and secure using Washer (C) and Finial (D).
5. For best appearance, we recommend locating shade seam directly behind the bar of the lamp. This will eliminate the unsightly seam shadow.

If you need further assistance, or find that you are missing any parts, please contact the dealer from which you purchased this product.

We hope you enjoy your fixture!
