black fixture wire
fixture ground wire
fixture body
cap nut
acrylic lens

1 : Place the mounting wall plate over the outlet box , align the mounting slots of the wall plate with holes of the outlet box as shown. Use a level to ensure the wall plate is straight.

2:Mark the location of the keyhole slots of the wall plate on the wall.   Drill a ¼" holes at the narrow end of each keyhole slot marking on the wall. Carefully hammer a wall anchor into each drilled hole.

3:Replace the mounting wall plate over outlet box, align the narrow end of each keyhole slot with its respective wall anchor. Feed the anchor screws through keyhole slots and thread them into the wall anchors until wall plate is flush against the wall. Additionally, fasten the wall plate to thread holes in outlet box using two outlet box screws, as shown.

5:*Pull the supply wires and house ground wire out from the outlet box before* attaching wall plate to outlet box.Make electrical connections, connect the black fixture black wire to the black supply wire and the white fixture wire to the white supply wire using wire nut . Connect the fixture ground wire to the supply ground wire together using wire nut . Wrap all wire connections with electrical tape to ensure secure connection.

6:Screw the fixture cap nut into the mounting bracket, and thread the hex nuts into fixture screws. Secure the fixture screws by tightening hex nut against the mounting bracket.

7:. Slide the acrylic lens into the fixture body.Place the cover on the fixture body and secure with the 3pcs final
